

DESKTOP-AS-A-SERVICE WITH SECURE FILE COLLABORATION

“Integrated with EasiShare, Nutanix enables organisations to manage, share and govern their files securely and with the ability to scale easily.

Especially in an era where unstructured data such as documents, media content, logs, keeps growing at an exponential rate, EasiShare and Nutanix offers a scalable solution for many organisations that struggle with data management. „

Nutanix Frame is a Desktop-as-a-Service (DaaS) solution that lets you access your apps on any device and from any location. You can easily create virtual workspaces for your teams, customers, or partners in under an hour.

Nutanix Frame enables organisations to deliver virtual apps and desktops to users worldwide. Either in the cloud with AWS, Microsoft Azure or Google Cloud Platform or on-premises with Nutanix AHV.

CHALLENGES

Shift to new delivery models

We live in an “as-a-service” world with a clear shift to managed services, and enterprise customers are accelerating their adoption. One of the drivers of change is a shortage of IT talent. Traditional VDI solutions require certified experts, and the best practices guides can be hundreds of pages long.

Need for options and flexibility

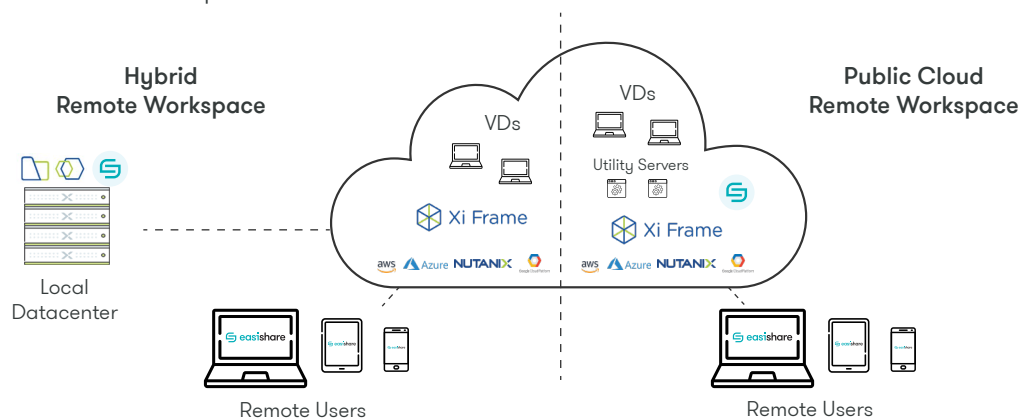

As the consumption of public cloud services continue to grow, customers are embracing bimodal practice. Mode ONE encompasses well understood, predictable workloads – something that most people want to run in their datacenters -- and mode TWO explores innovation areas and elastic workloads – for which public cloud infrastructure is great.

Massive secular trend towards security and compliance

Enterprises face serious challenges due to the lack of Security Ops expertise. They need to improve how they govern their data. At the same time, their workforce is increasingly mobile: employees use various devices to access company data.

SOLUTION ARCHITECTURE

EasiShare’s integration with Nutanix Frame adds additional security to how files are being shared and ensures a secure collaboration environment within an organization as well as with external parties.

RESOURCES

HOW IT WORKS

EasiShare can be leveraged in two ways with Nutanix Frame:

Hybrid Remote Workspace

For organizations that have to adhere to compliance and regulatory requirements, all user data can be stored on an On Premise Nutanix cluster. This Nutanix cluster will host all user data leveraging Nutanix Files or Objects together with EasiShare within the same cluster.

EasiShare is then easily deployed on Nutanix Frame VDI which can be hosted on AWS, Azure, GCP or AHV. Users can then securely access these Virtual Desktops on demand as well as access files and other content in a secure collaborative manner.

Public Cloud Remote Workspace

For organizations that are looking to purely leverage the Public Cloud and still have a secure environment, EasiShare can be deployed within the Nutanix Frame environment. This approach does not require any On Premise infrastructure to be deployed.

Nutanix Frame supports Utility Server to be deployed on the cloud of choice which can host the EasiShare services. This Utility Server remains online to ensure the On-Demand Virtual Desktops are able to secure access and collaborate via EasiShare.

KEY BENEFITS

Nutanix Frame is elastic by design, enabling organisations to scale up at their own pace. With Xi Frame, you only pay when you're actually consuming services.

Easy to Use. Leverage intuitive administrative interfaces and zero touch maintenance.

Proven at Global Scale. Provision up to 10,000 users per account in under an hour. Spin up secure cloud workspaces in any AWS or Microsoft Azure region.

Developer Friendly. Use your existing files, connect to IDaaS (like Azure AD or Okta), or extend your enterprise network to the cloud—Xi Frame has you covered.

Built for Security. Get maximum security and zero server footprint. After each Xi Frame session the VM you used is destroyed, so there's no data to protect.

Enterprise-Ready. Leverage the only multicloud Windows workspace service running at a global scale, reaching users in more than 200 countries.

www.inspire-tech.com

Established in 2000 in Singapore, Inspire-Tech has grown from a humble start-up into a future-driven and internationally expanding organisation which provides easy-to-use and secure software products and services.

Since its establishment, Inspire-Tech has helped more than 500 organisations to boost their workforce efficiency and productivity, and empower their employees to do more, sustainably.

www.nutanix.com

Nutanix makes infrastructure invisible, elevating IT to focus on the applications and services that power their business. The Nutanix enterprise cloud platform delivers the agility, pay-as-you-grow economics and operational simplicity of the public cloud, without sacrificing the predictability, security and control of on-premises infrastructure. Nutanix solutions leverage web-scale engineering and consumer-grade design to natively converge compute, virtualization and storage into a resilient, software-defined solution that delivers any application at any scale.
