

## Secure. Sync. Share. Simplified.

Recognised as a leader in government data security solutions, EasiShare helps to protect your files with a world class infrastructure and a trusted team.

### Key Functional Features

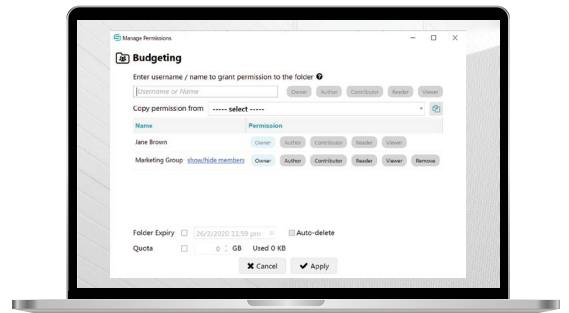

#### Secure File Transfer

- **Share & receive files securely**  
Share files internally and externally with expiry date and OTP, password protect and limit the number of downloads
- **Two-factor authenticated access**  
Add an extra layer of protection while transferring files with your preferred choice of 2FA
- **Track & monitor all transfers**  
Collect details on usage and analyse user activity patterns
- **Anti-virus scanning**  
Integrate with enterprise anti-virus software. Scan files automatically while uploading

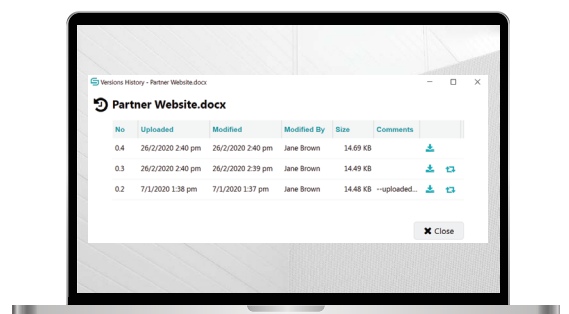

#### Content Collaboration

- **Collaborate using managed folders**  
Give your colleagues access to edit your files in managed folders while working on projects
- **One-step-editing with EasiShare desktop app**  
Save files automatically when you close the documents and avoid conflicts while editing
- **Encryption at rest and in transit**  
Encrypt all communication during transit and files at rest
- **Collaborate anytime, anywhere on any device**  
Edit, share, request files wherever you are using web, desktop or mobile application

#### Data Loss Prevention

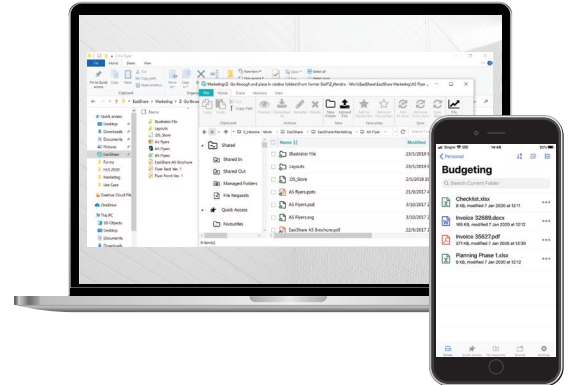

- **Remote/homing wipe**  
Block or wipe devices remotely to prevent unauthorised access if they get lost or stolen
- **Endpoint smart backup**  
Sync and restore files securely across all platforms
- **Admin recycle bin**  
View, delete, and restore items deleted from users' recycle bins
- **File sharing with watermarking**  
Prevent copy/paste, download or printing of confidential files
- **Keep track of the versions**  
Automatic configurable versioning of files to enable rollback

## Key Functional Features

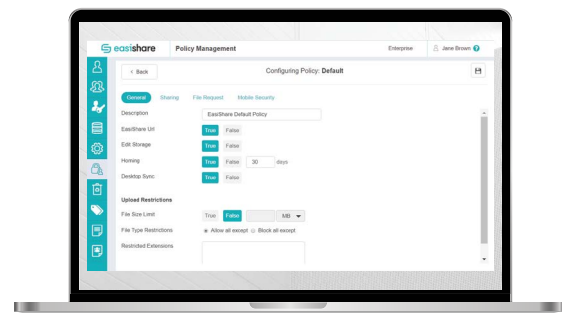

### ✓ User Experience

- **User-friendly interface**  
Easy adoption without needing extensive user training
- **Real-time file synchronisation**  
Sync content across computers and smart phones
- **Delegated permission management**  
Share multiple files with your colleagues instantly by giving different levels of access to the folders
- **Log in with single sign-on**  
Integrate to Microsoft AD for easier login process

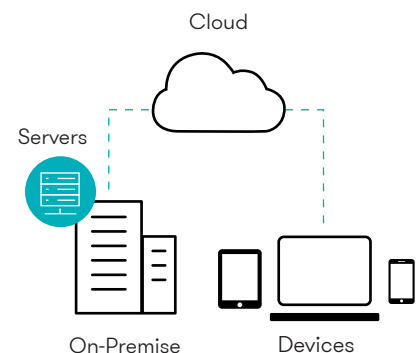

### ⚙️ Unified Administration

- **Centralised policy management**  
Manage permissions such as Owner, Author, Contributor, Reader and Viewer
- **Admin roles segregation**  
Delegate separate admin roles to different individuals
- **Group management**  
Set storage quotas, granular security policies for different groups of users
- **Seamless integration with other systems**  
Integrate with EasiShare in minutes using multiple connectors and create apps on top of EasiShare platform

### 🔒 Governance, Risk, Compliance

- **Keep track of sensitive data**  
Run EasiShare on your own infrastructure, with full control over your data
- **Air-gap architecture**  
Increase security with true internet separation model using EasiShare Enterprise Model
- **Smart reporting & auditing**  
Generate audit trails for all user and admins from a centralised admin portal
- **Compliance with corporate policies**  
Ensure high level of data security and privacy with data security controls and comprehensive audit logs

## About Inspire-Tech

At Inspire-Tech, we inspire ideas and imagination through smarter solutions. Through our convergent technologies that enhance productivity and workforce efficiency, we future-proof organisations of every size by revolutionising their digital workplace.
