

COMPLETE CONTROL & VISIBILITY OVER EVERY FILE

We help enterprises secure, manage, and govern mission-critical files, whether they are on-premise or in the cloud.

CENTRALISED ADMINISTRATION

Today, most data are unstructured and comes in various forms. These include videos, images, common Word files and voice recordings. And it's growing rapidly!

With the rapid rise of unstructured data, organisations are faced with data scalability and visibility issues caused by existing legacy storage silos. If left unchecked, enterprises are exposed to an increased risk of data breaches, ransomware, and compliance violations.

EasiShare modernises the way files are stored and secured across all data storages, all within a centralised platform.

FEATURES

User Management

Manage users through different privilege(s), group(s), and role(s) according to the organisation's requirements.

Policy Management

Define user/drive/group level policies to allow or limit app functionalities.

Admin Role Management

Differentiate admin access to the administrative portal by person's role in the organisation.

Group Management

Create a new group or import existing groups with multiple users that are defined by a specified policy.

Storage Management

Connect multiple types of repositories to EasiShare and manage them centrally.

Drive Accessibility

Selectively choose which devices are allowed to access each drive.

Name	Description
Default	EasiShare Default Policy
RegisteredUsers	Policy For Registered Users
CN=Domain Users,CN=Users,DC=esd...	Domain Users
CN=Domain Admins,CN=Users,DC=es...	
OU=EasiShare,DC=esdemo,DC=easis...	
Azure Demo_PolicyTests	For tests
OTP Disabled	OPT = FALSE
IntON_ExtON	IntON_ExtON
IntON_ExtOFF	IntON_ExtOFF
IntOFF_ExtON	IntOFF_ExtON

FEATURES

Audit Log

Monitor users' and administrators' activities performed on the files, folders and admin console.

Document Tag

Set up document tags with file sharing policies for users to categorise their files.

Access Review

Facilitate admins and data owners to review the permissions granted to the users within EasiShare.

Admin Recycle Bin

Stores all deleted items from user's recycle bin and recover maliciously/accidentally deleted files.

Data Removal

Remove all data from device(s) should it ever get lost or stolen, via an admin console trigger or self destruct through homing wipe.

Hybrid Authentication

Configure password policies combined with both two-step verification method - AD and app authentication.

Housekeeping Rules for Files

Auto-purge files that are unwanted after a specified period to ensure space efficiency.

Geo-Fence Files/Folders Access

Restrict confidential files from being accessed beyond internal network.
